EDUCATION

B.Tech (CSE)

PIET - Parul Institute of Engineering and Technology - Vadodara

Sept 2019 - Jan 2024

Programming Training

IA NT - Institute of Advanced Network Technology - Vadodara

Apr 2022 - Oct 2022

EXPERIENCE

Software Developer

MAXGEN TECHNOLOGY Ahmedabad

Jan 2025 – Present

Gentle Giant (Professional Home & Office Moving Services) [Website - Link](#)

- Converted **Figma** designs into a pixel-perfect React.js frontend.
- Implemented **Redux** for global state management to handle UI and application data efficiently.
- Designed and developed an **Admin Dashboard** to upload and manage company work and details.
- Implemented a fully responsive UI with mobile-first and cross-browser support.
- Integrated **Google Maps API** to display selected locations dynamically based on user options.
- **Tech Stack:** React.js, Bootstrap, JavaScript, APIs, jQuery.

Richard Lucas Subaru (Your Virtual Car Showroom) [Website - Link](#)

- Created components for a dynamic car showroom website using **React** and **JavaScript**, implementing a clean, responsive UI across multiple pages.
- Integrated **APIs** to fetch showroom data, including vehicle details, services, and promotions, ensuring real-time content updates.
- Implemented state management and routing to create seamless navigation between multiple pages and sections.
- Designed and implemented a responsive **Navbar UI** for smooth navigation between showroom sections and pages.
- **Tech Stack:** React.js, JavaScript, Bootstrap

Web Developer Intern

ACCIO TECH Ahmedabad

2023 Oct - 2024 April

- Developed responsive, mobile-first web pages using **React.js**, **HTML**, **CSS**, and **JavaScript** with cross-browser support.
- Converted Figma designs into pixel-perfect React components, maintaining consistent UI/UX.
- Integrated **RESTful APIs** to fetch dynamic data and implemented **Redux** for efficient state management.
- Gained hands-on experience with libraries and frameworks like **React Router** and **Axios**.
- Applied best practices in frontend development, including component reusability, performance optimization, and smooth navigation.

PROJECTS

- **QKart** – React-based e-commerce frontend featuring user registration and authentication, dynamic product listings, search, cart, and checkout using modern React hooks and components.
- **Medify** – Medical center booking application enabling users to search centers by state and city, book appointments with time slots, and manage bookings with persistent localStorage and a responsive UI.
- **Expense Tracker App** – Application enabling users to add, edit, and delete expenses, manage wallet balance in real time, visualize spending with charts, and persist data using localStorage.
- **AI Chat Application** – Interactive chat platform allowing users to converse with an AI, provide like/dislike feedback, rate conversations, add subjective reviews, and manage conversation history with a responsive UI.
